

Creative Curriculum Project 2017-19

Feedback and Evaluation Form – End of Theme

Q1 – How many teachers/non-teaching staff were involved in the project? How many pupils were affected by the project? Were other people (e.g. parents, external organisations etc.) involved in the project?

We were only two teachers involved in Challenges. We both had our own classes. Karen 22 students and Betina 48 students (two English classes)
The parents were informed about the project and what goals we had.

Q2 – How did you plan the project theme? How did you work collaboratively?

We planned it together so that Karen would do the work in 2nd grade during her Danish lessons and Betina during English lessons in 5th grade.
We talked about what challenges we had in class and helped each other find solutions and game that could strengthen the sense of togetherness in the class.

Q3 – How do you feel about the project now? Did you get more energy and motivation? Was it a heavier workload? (If yes, why? Are there any changes possible for the next theme?)

We were both very excited about the work because both our classes needed to come more together as a class and not work as individuals in all aspects.

Q4 – What did you do well during this project theme? What will you do differently next time?

The children liked all the different games we had planned. I would make a much clearer questionnaire for the students one that was easier to comprehend.
And maybe we could be better at evaluating in small steps. And have a deadline for when do we want the changes to be a natural part of everydaylife.

Q5 – Any other comments?
