

Creative Curriculum Project 2017-19

Feedback and Evaluation Form – End of Theme

Q1 – How many teachers/non-teaching staff were involved in the project? How many pupils were affected by the project? Were other people (e.g. parents, external organisations etc.) involved in the project?

For this project we were 2 teachers and we planned it in 2 weeks' time, we meet for about 3 hours to plan it all. There are 42 students in 3 classes, they are between 9-10 year old.

Q2 – How did you plan the project theme? How did you work collaboratively?

We wanted to combine the work with the movie Avatar and the 4 elements. We had an entire week available to work with and about the elements. Every morning the classes saw small clips of the series Avatar. Monday: Water, we did small experiments to see what floats and what didn't. Tuesday: Earth/dirt, we planted seeds. Wednesday: We blew up balloons. Friday: Fire, we made candles and lit a bonfire.

Q3 – How do you feel about the project now? Did you get more energy and motivation? Was it a heavier workload? (If yes, why? Are there any changes possible for the next theme?)

It was great that the two classes were situated right next to each other. And very nice to have an entire week to totally immerse to one topic. The students were very excited every day to see what was next to come. And to do all the experiments. And we completed everything that we planned.

Q4 – What did you do well during this project theme? What will you do differently next time?

I planned (KW) everything and the other teachers helped execute the plan. And everyone helped with the purchasing everything for the week the week before.

Q5 – Any other comments?

It was really great to so much time to do all the experiments also because everyone of the students got to do all of the experiment not just one group or a few students.
